

Table 1. People with a COVID-19 diagnosis in the previous 14 days who were admitted to hospital, admitted to ICU or reported as having died in the week ending 05 November 2022

	Admitted to hospital	Admitted to ICU	Deaths
Vaccination status[^]			
Four or more doses	133	11	11
Three doses	67	4	7
Two doses	39	2	3
One dose	1	0	0
No dose	0	0	1
Unknown	70	8	2
Total	310	25	24

[^]Excludes cases in correctional settings

[^]Vaccination status is determined by matching to Australian Immunisation Register (AIR) data. Name and date of birth need to be an exact match to that recorded in AIR for vaccination status to be determined. People with unknown vaccination status were those unable to be found in AIR. This may occur when names in AIR are different, for example shortened name or different spelling, to those used for the COVID-19 notification.
